Yours, truly, Verde, August 5th, 1878. A Decision Concerning Railroad Lands.

H. W. G.

Secretary Schurz has given a decision elation to the conditions under which lands granted to railroad companies may be prethe Kansas Pacific Company, but it covers every similar case. In the grant of lands voted by Congress was the condition that 'all such lands so granted by the section which shall not be sold or disposed of by said company three years after the entire road shall have been completed, shall be subjected to settlement and pre-emption like other lands, at a price not exceeding \$1.25 per acre, to be paid to said company." churz decides that the sale and disposal of of congestion of the brain, aged 51. tlement and pre-emption like other lands, at a price not exceeding \$1.25 per acre. In other words that said lands shall revert to a few weeks, in the building now occur at a price not exceeding \$1.25 per acre. In other words that said lands shall revert to the public domain, for sale and disposal for the company under the pre-emption laws of the company under the company the company under the pre-emption laws of the United States. If this decision shall apply to the lands granted to the Northern Pacific and the Texas Pacific companies, as it unquestionably ought to, the rapacious land-grabbers and speculators who are buy-ing up the best farming tracts to sell them to settlers in good faith at exorbitant rates will be prevented from further pursuing

that system of plunder.

Lighting the Palace with Electricity. The Brush-Gramme electric light is used for illumination purposes every night at the Palace Hotel. No gas ight heretofore em-ployed has been half so effective as the four englobed jets that are swung from the glass encased roof of the court-yard. A day or two ago the city was under a solar eclipse, an eclipse that covered three-fourths of the sun's surface. The one-fourth of solar effulgence that straggled to us was still sunlight, and not to be mistaken for the full moon. There was a ghastliness of effect that had no similarity with gaslight at street corners, or a blaze of light from better that had no similarity with gaslight at street corners, or a blaze of light from the street mains. The electric lights are a trifle less in intensity compared with sunlight, even obstructed by planetary law, but they are sufficiently strong to cast deep shadows behind the columns that front the galleries of the Palace, and any one whose even have englobed jets that are swung from the of the Palace, and any one whose eyes have normal power may read the smallest newspaper print without difficulty, whether on the top gallery or in the basement. The lights are sustained at a uniform power, and while perfection of illumination is in favor of the electric light, so far exhibited, the question is whether it is cheaper to jet the interior with gas from the mains. Com-OAKS and WILLOWS pared with the electric light, the gas of the rooms is vellowish and very inferior. The cost of the electric light is regarded as trifling compared with the exactions of the

dertake to freed the Indians we ought to give them enough to live on. Here is an agent in Arizona who reports that he is enaugh the Indian Bureau has given him authority to make some purchases, the amount that he can get in that way will not last a week. As Geogral McDowell pertinently remarks, as Geogral McDowell pertinently remarks. The Indians won't stay on the Reservation and starre. If they can get no food there they will go away to look for it, and then the army will have to start out after they and chase them around the country unit he approach of winter brings them back to the reservation again. If there is not room enough on this continent for the Indians to live in their own way and gather their own enough on this continent for the Indians to live in their own way and gather their own when we are told he was informed by a responsible man who had overheard a conversation but the reservation again. If there is not room enough to the country in the approach of winter brings them back to the reservation again. If there is not room enough on this continent for the Indians to live in their own way and gather their own when we are told he was informed by a responsible man who had overheard a conversation between parties sleeping in an adjoint the least regard for the chairman, who as that the line kills, beyond Tres Alamos. On the day he was to have passed that point the islegraph wires between Tres the business has been managed for a great many years past, it would be cheaper to bring the man who had a to see place a portion of the wire was taken away to avoid probably, rapid repair. Of course Mai, Towler different to him. They were to make the upon the gallant young men of Tucson for a point the telegraph wires between Tres telliferent places, and at one place a portion of the wire was taken a way to a world the was that upon the gallant young men of Tucson for a point report of the post of the post

upon the gallant young men of Tucson for anything in the world. Why, Bro. Beach, what do you mean? Has there been a "corner" on fine tooth combs in Prescott, of intentions.—[Tucson Star.

There is one strong argument in favor of the army, that it would prevent the War Department and the Department of the Incirc from tossing the responsibility for every outbreak backward and forward from one to the other. It seems just, too, that as long as the army always has to be called upon to restore order it should have an opportunity of maintaining order, or at least of showing whether it could do to or not. But which ever of the departments be charged with this duty, one thing is very clear; if we undertake to feed the Indians we ought to give them enough to live on. Here is an agent in Arizona who reports that he is entered to the company considering it is announced will be early onto the charged with the completion of the Atchison Topeka and Santa Fe Raiiread to Las Vegas, New Mexico, which it is announced will be early onto the company considering to the company considering to the company considering to their presence has doubtless had somewhat to do with this decision, the company considering it better to close their works for a time than to rua the risks of a costly experiment which carries so much evil in its train. We fear that the difficulty in obtaining an abundant supply of charcolle to the departments be charged with this duty, one thing is very clear; if we undertake to feed the Indians we ought to give them enough to live on. Here is an agent in Arizona who reports that he is entirely one the control of the Atchison to the carries are the control of the Atchison to the contro
